

To: whom it may concern

I would like to take this opportunity to praise one of the premiere off highway vehicle recreation areas in southern California. This letter is regarding Competitive Edge Motocross Park. My name is Nathan Bristol and I have lived in southern California for the past 33 years in the High Desert area. Over that time period I have been witness to the evaporation of local public access to off road areas. Off highway vehicle use specifically motorcycle riding has been an athletic, responsible, and educational part of my life and I would like to raise my children with similar options. The recent law changes have made it difficult and illegal for Californians to use open land for recreational purposes, fortunately innovative Cities have filled that gap by providing a motocross park. The idea of giving young adults and children one more fun and athletic option is pure genius. Giving the High Deserts youth a healthy and legal way to fill their desire for excitement other than crime and drugs is a great way for the future of Hesperia. The pros outweigh the cons for a motocross park in southern California, and with some local support and the City of Hesperia's guidance Competitive Edge MX Park will continue to be the premiere Park in California.
